AI-READY YOUTH WORK

TRAINING COURSE

17-25 August
Mórahalom – Hungary

**Learn AI, Question AI,
Use AI Responsibly**

PROJECT DESCRIPTION

AI-Ready Youth Work is a training course aiming to strengthen the capacity of youth workers to **use generative AI responsibly, ethically and effectively in non-formal education**. Artificial intelligence is becoming increasingly integrated into our everyday life, therefore, the youth work field needs practitioners who understand how these tools work, and how they can be implemented in non-formal education without compromising creativity and young people's independent thinking.

Throughout the training course, **participants will explore the opportunities and risks of using generative AI** in non-formal education settings. They will experiment with a variety of AI-based tools and develop engaging educational activities. At the same time, **the course will address ethical considerations**, including privacy, intellectual property, transparency, misinformation and the environmental impact of AI.

The program will be based on **non-formal education methods** such as simulations, groupwork, peer-to-peer learning, debates, case studies and practical tasks. As a result, participants will gain confidence in using AI as a supportive tool while at the same time prioritising human-centred approaches and values-based youth work practices.

OBJECTIVES

- ➔ To increase participants' **understanding of generative AI**, including its opportunities, limitations and societal impact.
- ➔ To strengthen participants' **practical skills in using AI tools while developing non-formal educational activities**.
- ➔ To encourage participants to **think critically and assess ethical considerations** before integrating AI in their youth work practices.
- ➔ To support participants in **designing interactive workshops** balancing technological innovation with meaningful human interaction.
- ➔ To create **space for the exchange of practices and peer learning** among youth workers from different countries.

EXPECTED RESULTS AND LEARNING OUTCOMES

Knowledge

By the end of the project, participants will understand **how generative AI produces content, and what are the opportunities, limitations and risks** associated with AI technologies.

Participants will also learn about the **potential of using AI in youth work responsibly** and effectively. They will learn how to integrate AI tools without compromising meaningful human interaction.

Participants will **gain awareness of the environmental and social impacts of AI technologies**. They will become familiar with ethical principles related to AI, including transparency, misinformation, bias, privacy and intellectual property

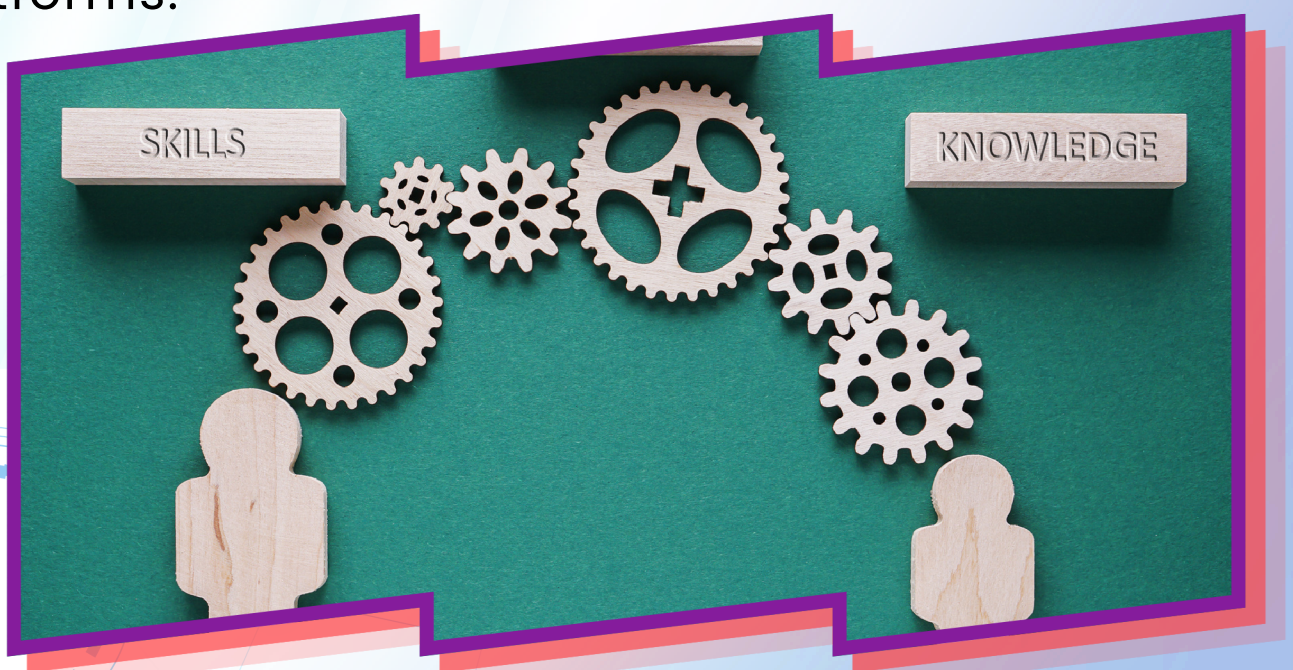

EXPECTED RESULTS AND LEARNING OUTCOMES

Skills

Participants will be able to **identify and use a range of generative AI tools** that are relevant for youth work and educational purposes.

After the project, they will have **improved capacity to design various types of non-formal educational activities using AI.**

They will also develop the relevant **skills needed to critically evaluate, fact-check and improve AI-generated materials** before using them. They will also be able to identify privacy risks and avoid sharing sensitive personal information through AI platforms.

EXPECTED RESULTS AND LEARNING OUTCOMES

Attitudes

After the project, participants will have **more confidence in experimenting with new digital tools.**

Participants will develop **curiosity and openness towards technological innovation** while recognising its limitations. Participants will encourage young people to use AI as a tool for learning rather than as a substitute for creativity or independent thinking.

They will **consider ethical approaches before AI use.** They will show more responsibility and critical thinking when working with AI-generated content. They will also respect privacy, personal data use, and the rights of young people in digital environments.

PARTICIPANTS PROFILE

- Youth Workers or interested in working with young people
- no age limit (18+)
- able to communicate in English,
- motivated to meet people from different countries,
- interested in exploring the topics of the project
- motivated to share experiences and knowledge
- available to participate for the whole duration of the project
- bringing a respectful and propositive attitude
- Motivation to learn about the potential use of AI in their future educational activities
- Experience in youth work, training, and education is an advantage. highly motivated learners with a desire to inspire and empower youth, and readiness to act as multipliers in their communities and organizations are warmly encouraged to apply.

PARTICIPATING COUNTRIES

Hungary

Georgia

North Macedonia

Albania

Italy

Slovakia

COSTS AND TRAVEL

To support participants financially and make the travel process easier, **the coordinating organisation can purchase the tickets in advance.** After the selection, the project coordinator will contact each participant to agree on the most suitable travel option.

Before any ticket is purchased, **participants must confirm their full availability and commitment to attend the entire training course.** Since the tickets will be paid for directly by the organisers, participants who confirm their attendance but later withdraw may be required to reimburse the travel costs already covered.

The accommodation and food will be covered 100% by the grant of Erasmus+ programme.

Participants will be responsible for purchasing any local transportation needed in their home country, such as a bus or train to reach the airport. **These costs will be reimbursed in cash during the mobility,** provided that participants keep all original tickets and receipts.

COSTS AND TRAVEL

Before purchasing any local transport, please contact the project coordinator to confirm that the cost fits within your available travel budget. Erasmus+ travel support is limited and calculated according to the official distance bands, so **any amount above the approved budget cannot be reimbursed.**

Travel costs can be reimbursed only if:

- Your travel route is from your hometown to the venue in Hungary and back (if you are not traveling from your hometown, contact us previously).
- You have chosen reasonable and economic means of transportation (cheap airlines, 2nd class trains, etc., NO TAXI)
- Your travel dates are according to the programme
- You keep all receipts, invoices, boarding passes and bus or train tickets. These documents are necessary to prove the expenses and complete the reimbursement.

ABOUT THE VENUE

The venue of the project will be in **Mórahalom**. A nice Spa town just next to Szeged, one of the most beautiful city of Hungary.

The accommodation will be a modern and recently renewed College called "Szegedi SZC Tóth János Mórahalmi Kollégium"

The participants will be accommodated in **shared rooms, 2-4 per room**. Breakfasts, lunches, and dinners, will be provided by the organizers.

All the instructions on how to arrive at the venue will be sent by email.

Below you can find photos of the venue:

ABOUT THE TRAINER

Tamar (tako) Tsatskrialashvili is a trainer in human rights education, environmental sustainability and personal development.

Tako has 7 years of experience in international youth work. She is a member of the Trainers' Pool of the Youth Department of the Council of Europe.

She designs and implements educational programs based on non-formal education with various non-profit organisations.

She has worked as a project coordinator, course director, trainer, and facilitator on over 30 international activities.

CHECKLIST / WHAT TO DO & WHAT TO BRING:

Bring your own **water bottle**

Towels and your own hygiene equipment (shower gel, shampoo, ect.)

Comfortable clothes to use in external activities

Food and drinks from your home community to share with others during informal time

Health insurance documents: the health/ travel insurance is in the responsibility of the participants, make sure you are covered during your trip.

Participants will be asked to bring their European Insurance Card and we will have available transportation to a nearby hospital in case of emergency.

If you have a laptop and can bring it with you, we kindly ask you to do so. You might need it for several sessions. If you don't have one, no worries, we will find a way to ensure everyone is equally involved.

We will also ask for the boarding passes, bus/train/metro tickets so be sure to keep them!
